

Application for Addition to Recommended Technology Tools

Please enter information in each box. Replace the default text with your responses.

Recommended by: Lori Soderberg

Tool: Flip Video Recorder Package

Cost:

Item	Cost
Pure Digital Flip Video Ultra Series Model F230	\$125.00
Lenmar Mach 1 Battery Charger with 4 AA Rechargeable Batteries	\$25.54
Case Logic TBC4 large Digital Camera Case – Nylon – Black	\$12.00
USB Extension Cable 3'	\$4.00
	Tax \$14.82
	Total \$181.36

Target Group: K-12

Standard: This tool has the capability to be integrated into all content areas to enhance and support student learning.

Need: Why is it needed? This provides a low-cost, easy-to-use way to create videos, running records, record student progress, etc.

The IMD currently has a lab of 18 Flips which are constantly being checked out for classroom use. Many times, there are multiple teachers requesting to use the lab at the same time.

Research: Research has shown that 21st Century learners are more visual. Students need to have different venues to demonstrate their learning (multiple intelligences). Video is one avenue in which students can do so.

Many of the teachers involved in the Peer Coach program in Edmonds are already using the Flips.

Support: Yes, this technology tool can be supported through the district.

Training: What are the Professional Development needs? At least 1 hour of PD will be required in order to learn how to use this tool.

Who will support this? The IMD Coordinators

Approval of Recommendation

This section for District Office Use Only

This form should be submitted by a T&L Coordinator or a Student Services Representative

T&L Coordinator or
Student Services Rep: Lori Soderberg

Approved by: Kim Mathey

Send approved recommendation to Kim Mathey for inclusion on district list.
