

Application for Addition to Recommended Technology Tools

Please enter information in each box. Replace the default text with your responses.

Recommended by: Scott Barnes

Tool: Smartmusic software

Cost: \$125 1st site license, \$25 each additional license -- annual fee. Students could also purchase the software for \$25 each for home use.

Target Group: K - 12 Music

Standard: This program will support all music EALR's

Need: Tool for teaching and assessing music theory, composition, performance skills. It could be used to track CBPA's, and assess student achievement in key skill areas.

Research: This program is highly effective and recommended by music educators. Shoreline School District installed it on teacher and student laptops and the results have been very positive.

Support: Smartmusic works equally well with Mac and PC platforms, and shouldn't be a support concern.

Training: Teachers would need to be trained, and I could arrange for this training with a local Smartmusic facilitator. Funding for the training could come from the District music budget

Approval of Recommendation

This section for District Office Use Only

This form should be submitted by a T&L Coordinator or a Student Services Representative

T&L Coordinator or
Student Services Rep: Scott Barnes

Approved by: Scott Barnes

Send approved recommendation to Kim Mathey for inclusion on district list.
