## Why Apply for a Honors Scholar Diploma?

As an educational community we are pleased to offer students a rigorous diploma program in addition to the International Baccalaureate Diploma program offered at Edmonds-Woodway High School. This diploma option is for students who seek a more challenging high school course of study but who want to remain at their neighborhood high school.

Teams of teachers have been creating ninth and tenth grade honors courses to prepare students to attempt these diploma options.

We encourage and invite you to learn more about this opportunity for your student.

## Academic Honors Scholar Diploma

For the **Academic Honors** Scholar diploma, students must complete all ESD Graduation Requirements and

- Earn 1 additional math credit (beginning 2013 graduation requirement.)
- Earn an additional science credit.
- Earn 3 world language credits.
- Have an overall grade point average of a “B” or better.
- Complete 3 credits in Advance Placement courses and pass corresponding exams.
- Complete the enhanced Culminating Project, focusing on a selected academic field of study. The project must incorporate related field service or research. The project must also include a portfolio including a personal essay suitable for college admission.
- Complete 90 hours of community service.

## Or Technical Honors Scholar Diploma

For the **Technical Honors** diploma, students must complete all ESD Graduation Requirements and

- Complete 2 or more credits in a specific Career-Technical Education (CTE) program of study with a “B” (3.0) or better.
- Complete dual high school/college credit courses in a specific CTE program of study and obtain at least 5 college credits.
- Have an overall grade point average of a “B” (3.0) or better.
- Complete one of the following:
  - ▶ A 90 hour Internship, Cooperative Work Experience, or Volunteer Service Experience within a specific CTE program of study, or
  - ▶ Participation in a regional, state, and/or national CTE student leadership competition connected to the CTE program of study area. (examples include DECA, FBLA, FCCLA, FFA, TSA, Skills-USA, and FIRST Robotics), or
  - ▶ Earn a state-approved, industry-recognized certification related to the CTE program of study.
- Complete the Culminating Project, focusing on the student’s selected technical program of study. The project must include a portfolio of work demonstrating attainment of technical skills and knowledge suitable for continued college training, apprenticeship entry, or direct employment within the program of study area.
