

Cellular Telephones

The school board authorizes the issuance of cellular telephones to staff designated by the Superintendent or designee for district business and emergency communications at times when regular telephone services are not readily available.

At the time a designated employee accepts a district-provided cellular telephone, he/she/they shall provide written assurance of financial responsibility for any personal or non-business use that results in increased costs to the district.

The Superintendent or designee may determine that certain positions are eligible for a district paid stipend in lieu of a district-provided cellular telephone based on their job duties. Employees who receive a stipend for cellular telephone access must keep their cellular service active and make their cellular telephone number available to the district for emergency calls both during and outside of regular working hours.
