

Unintentional Injury for Lynnwood High School (Edmonds School District)

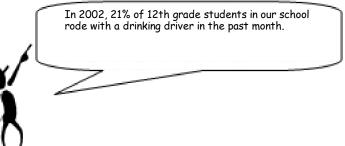

Year: 2002 Grade: 12 Gender: Both Ethnicity:

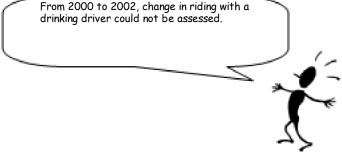

# Highlights

- Unintentional injury is the leading cause of death among youth.
- Unintentional injuries are caused by behaviors such as not wearing a seatbelt, riding a bike or motorcycle without a helmet, drinking and driving, riding with a drunk driver and not wearing a life jacket.
- Motor vehicle crashes are the most common type of injury death among youth.

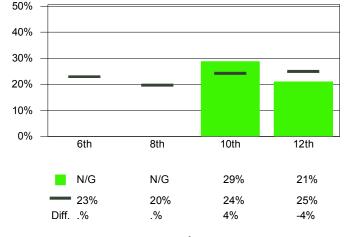

#### For More Information

Most unintentional injuries are not accidents because they can be prevented. Alcohol and other substances impair one's judgment and may contribute to the likelihood of many injuries and even death. For more information and resources, visit the Washington State Injury and Violence Prevention Website at: http://www.doh.wa.gov/hsqa/emstrauma/injury/

# School Risk Factors for Lynnwood High School (Edmonds School District)

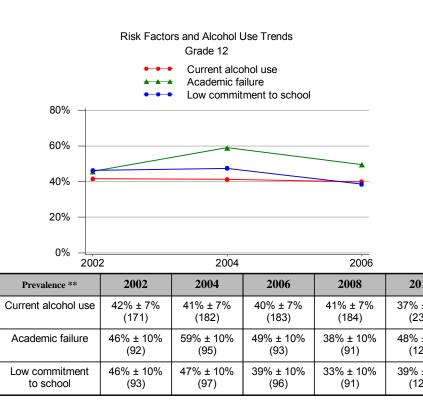

Year: 2002 Grade: 12 Gender: Both Ethnicity:

## Hiahliahts

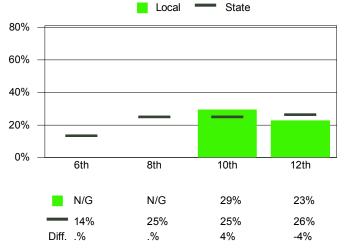

- Research has identified a unique set of risk factors that put youth at risk for problems, such as substance use and school drop out.
- Youth who get poor grades, have friends who smoke, experience family conflict, and live in neighborhoods that are disorganized are at greater risk for negative youth behaviors.

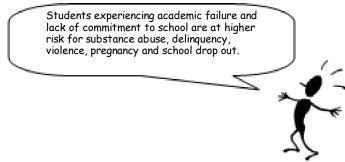

Does Not Enjoy Being at School Compared to the State, All Grades, 2002

## For More Information

Supportive learning environments are essential for student academic achievement. Students need safe, nurturing, healthy, and civil schools in order to be successful. Researchers have identified best practice support programs that, when implemented with fidelity in schools and classrooms, can decrease risk factors and build positive school cultures.

For More Information about school risk factors, visit the website http://captus.samhsa.gov/western

Physical Activity for Lynnwood High School (Edmonds School District)

Year: 2002 Grade: 12 Gender: Both Ethnicity:

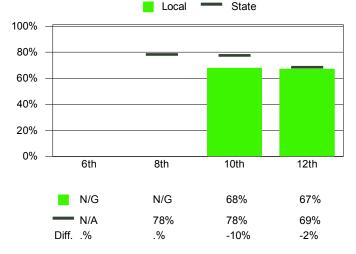

# Highlights

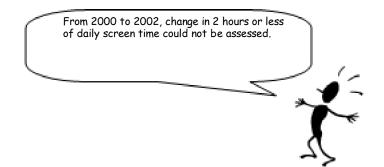

- Regular physical activity reduces rates of obesity and serious diseases, helps people maintain a healthy body weight and improves quality of life.
- The Centers for Disease Control and Prevention (CDC) recommends 60 minutes of physical activity on five or more days a week.
- One challenge to being more physically active is the amount of recreational screen time spent on sedentary activities such as watching TV, playing video games or using a computer for fun.

Meeting Recommendations for Moderate or Vigorous Activity Compared to the State, All Grades, 2002

## For More Information

Many social and environmental factors influence the decision to be active. Successful strategies to promote physical activity include educating individuals and developing policies to create environments that support being physically active.

For More Information and resources visit the Washington State Nutrition and Physical Activity Website at: www.doh.wa.gov/cfh/nutritionpa

\* indicates a significant change (Wald X<sup>2</sup>, p<.05)

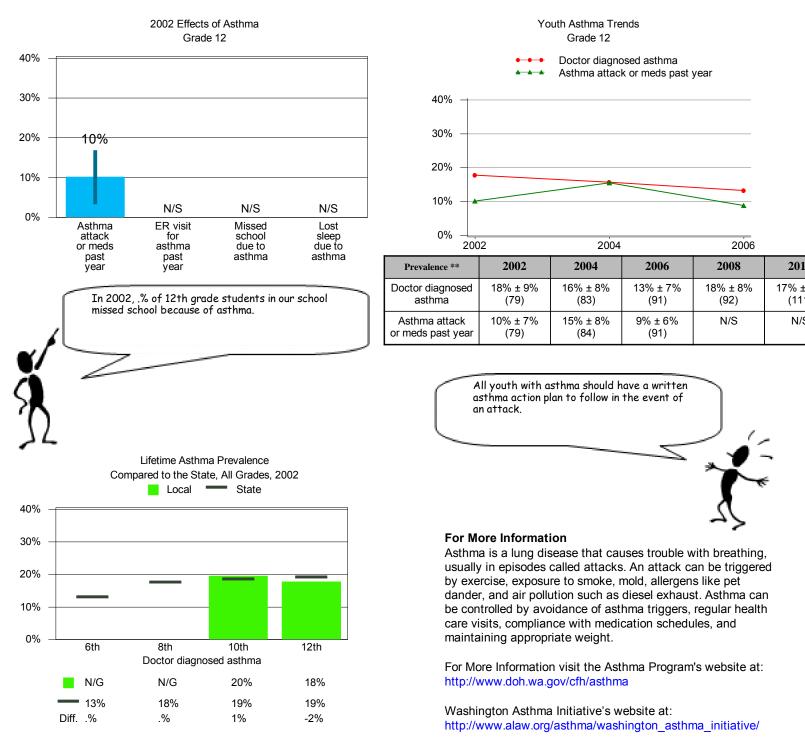

Asthma for Lynnwood High School (Edmonds School District)

Year: 2002 Grade: 12 Gender: Both Ethnicity:

# Highlights

- In Washington State, about one in five youth have been diagnosed with asthma.
- Among youth with asthma, about one in five had at least one visit to an emergency department for asthma attack during 2006.
- Youth who smoke are more likely to have asthma.

\* indicates a significant change (Wald X<sup>2</sup>, p<.05)

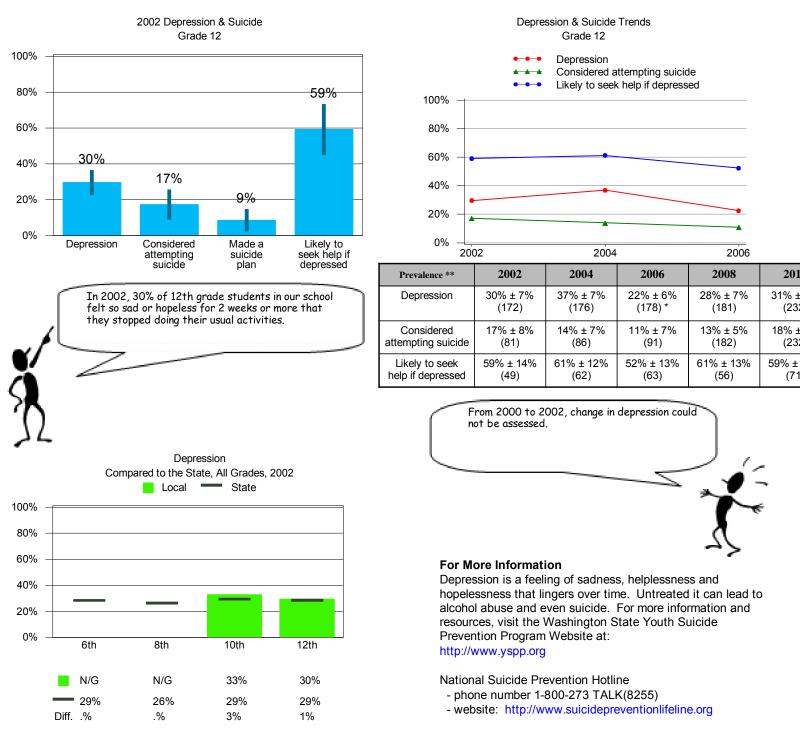

Depression & Suicide for Lynnwood High School (Edmonds School District)

Year: 2002 Grade: 12 Gender: Both Ethnicity:

## Highlights

- Suicide is the second leading cause of death for Washington teens 15-19 years old.
- Most youth suicides occur at home.

\* indicates a significant change (Wald X<sup>2</sup>, p<.05)

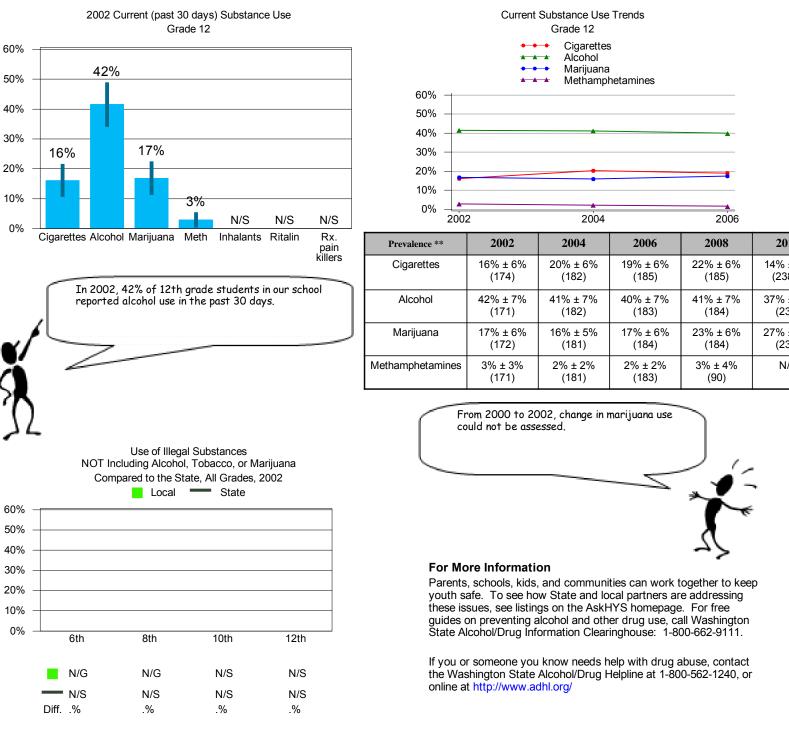

Current Substance Use for Lynnwood High School (Edmonds School District)

Year: 2002 Grade: 12 Gender: Both Ethnicity:

# Highlights

- Parents are the primary influence on their children's decision to use alcohol, tobacco, and other drugs.
- Brain development continues into the early twenties. The growing brain is more vulnerable to long-term impact from alcohol and other drugs.

\* indicates a significant change (Wald X<sup>2</sup>, p<.05)
